FLOOR MACHINES

The 36-Volt **RS** offers superior cleaning and drying of floor surfaces with the use of standard heavy duty brush and vacuum motors. Three unique scrubbing systems:

SCHOOL - Gym Floors

The **EDGE** scrubdecks (24" & 28") offer high speed oscillation that allows the RS to remove layers of floor finish with only tap water and without the use of harmful chemical strippers.

RETAIL - VCT or Concrete

The **Disk** scrubdecks (20", 26", & 28") work well on uneven surfaces by utilizing its gimbaled drives.

HEALTHCARE - Grouted Tile

The **Cylindrical** scrubdecks (24" & 27") are ideal for grout lines, rubber floors, and sweeping debris while scrubbing.

The scrub head is protected by the frame's heavy steel construction, with non-marking tires and bumper wheels to protect against marks. Like all **TOMCAT** equipment, the **RS** is entirely Made In The USA, with American components that are assembled with stainless fasteners.

On close inspection you will notice the axle, casters, squeegee linkage and battery package all mount directly to a 10 gauge steel frame, which is powder coated for protection. The 36-volt system brings large rider performance into the "micro" rider class.
